

Paris, September 22, 2015

Press Release

Plastic Omnium is partnering with 13 worldwide car manufacturers for equipping diesel vehicles with depollution systems called SCR.

Those systems are managed and monitored by the engine control unit (ECU) which is under the full responsibility of the car manufacturer.

Plastic Omnium delivers, for this system, the urea tank and the dosing pomp which sprays the urea quantity requested and validated by the car manufacturer in order to comply with environmental regulations in each country.

Plastic Omnium does not deliver any depollution system on the Volkswagen Group vehicles concerned by the Environmental Protection Agency (EPA) report on September 18, 2015.
