

Bordeaux Métropole awards two new markets to Plastic Omnium Environment

Bordeaux Métropole (formerly CUB (Bordeaux Urban Community)) – which covers 28 towns and villages and 724,000 inhabitants – has awarded Plastic Omnium Environment two important markets for a four-year period.

The first market involves the supply of more than 140,000 wheeled waste collection containers for the collection of household waste and the selective recycling of waste.

The second market, which has just been awarded, is the maintenance of waste equipment.

Plastic Omnium will provide these services from its service base at Mérignac, where ten people are employed.

About Plastic Omnium Environment:

With sales in 2014 of €432 million and 2,000 employees worldwide, Plastic Omnium Environment supports local authorities in achieving their recycling objectives, provides reliable, aesthetic solutions which can be adapted to all types of environment, and offers equipment maintenance and upkeep services. To meet its customers' needs in an even more targeted way, Plastic Omnium is also developing IT solutions for the management of pre-collection and collection data.
