HUMAN RESOURCES AND SUSTAINABILITY FUNCTIONS TO BE MERGED

NEW DEPARTMENT TO BE HEADED BY DAVID MENESES,
CURRENTLY EXECUTIVE VICE-PRESIDENT SUSTAINABILITY

“Societal and environmental matters are very important for our teams, and the way we address them is essential for attracting new talents. The merger of Sustainability and Human Resources functions shows how important it is for Plastic Omnium to be even more people-centric. In a mobility industry that is undergoing profound change, we are convinced that engaging and motivating our talented people will be crucial to achieve our ambitious growth strategy,” said Laurent Favre, Chief Executive Officer of Plastic Omnium.

David Meneses has been appointed as Executive Vice-President People & Sustainability and a member of the Executive Committee. Reporting to Laurent Favre, his mission will be to pool the employee engagement stakes shared by the two functions while pursuing their respective strategic roadmaps, in support of Plastic Omnium's transformation.

From 14 June 2022, David Meneses will take over the Human Resources role previously held by Jana Kley, who is leaving the Group.

David Meneses joined Plastic Omnium in 2021 in the newly created position of EVP Sustainability. Previously, he held similar position at Air Liquide since 2017. Throughout his career in the industry, David Meneses has successively held positions in R&D, business development, marketing - both in France and in Japan - as well as operational business positions in the United States and Central America.

David Meneses, 49, is a graduate from ESPCI Paris engineering school (École Supérieure de Physique et Chimie Industrielles de la Ville de Paris) and holds a post-graduate degree in Process Engineering.

About Plastic Omnium

A world leader, Plastic Omnium provides innovative solutions for a more connected and sustainable mobility. The Group develops and produces intelligent exterior systems, clean energy systems and customized complex modules. With €8 billion economic revenue in 2021, an international footprint of 137 plants and 31 R&D centers, Plastic Omnium relies on its 30,000 employees to meet the challenges of clean and smart mobility. Innovation-driven since its creation, Plastic Omnium is now paving the way for zero carbon mobility through its investments in hydrogen solutions, where the Group has ambitions to become world leader throughout the entire value chain.

Plastic Omnium is listed on Euronext Paris, compartment A, is eligible for the Deferred Settlement Service (SRD) and is part of the SBF 120 and CAC Mid 60 indices (ISIN code: FR0000124570). www.plasticomnium.com
