

OPmobility reinforces market leadership in India with record time product development

OPmobility has been awarded a key business by an automotive manufacturer in India, for the record time product development of a full bumper and grille destined to one of its customer's light duty truck models.

This contract was made possible by the competitive delivery of a prototype and series-ready product in less than 15 months, compared to an average of 26 months in India, which showcases OPmobility's capacity to adapt to the growing need of the industry to develop new products in significantly shorter times. The start of production is planned by the end of 2026.

The award also reflects the growing presence and leadership of OPmobility in the Indian market, which output is expected to grow 4.7% on average between 2025 and 2030 (source: S&P Global Mobility). One out of two vehicles in the country is equipped by OPmobility today. The Group operates four R&D centers and five plants in India, and plans to open four other plants in the country by the end of the decade.

Christian Kopp, Senior Executive VP and President of the Exterior & Lighting Business Group of OPmobility, said: *"The award of this contract by an Indian automotive manufacturer illustrates the talent of our teams and their agility in a fast-changing market. It also highlights our proximity with OEMs worldwide and allows us to reinforce our partnership with this long-term customer. Already a key player in this strategic country, OPmobility keeps investing significantly in India, the world's third-largest automotive market and a growing industrial player. Our ambition in India is not just to supply our customers in the country, but also to use its capacities to improve our overall competitiveness in engineering and industrial production in all our countries."*

About OPmobility

OPmobility is a world leader in sustainable mobility and a technology partner to mobility players worldwide. Driven by innovation since its creation in 1946, the Group is today composed of four complementary business groups that enable it to offer its customers a wide range of solutions: exterior and lighting systems, complex modules, energy storage systems and battery and hydrogen electrification solutions. OPmobility also offers its customers an activity dedicated to the development of software, OP'nSoft.

With economic revenue of 11.6 billion euros in 2024 and a global network of 150 plants and 40 R&D centers, OPmobility relies on its 38,900 employees to meet the challenges of sustainable mobility.

OPmobility is listed on Euronext Paris, compartment A. It is eligible for the Deferred Settlement Service (SRD) and is included in the SBF 120 and CAC Mid 60 indices (ISIN code: FR0000124570). www.opmobility.com
