OPmobility confirms the success of its One4you integrated offer with a major award from Stellantis

OPmobility has been awarded a major contract for its integrated One4you offer by Stellantis in Europe. With this award, OPmobility will supply a fully integrated rear module - bringing together the rear bumper and an innovative thermoplastic tailgate with built-in lighting - for the next generation of an electric SUV (Sports Utility Vehicle). This contract confirms the strong momentum behind OPmobility's One4you offer, with 10 awards with several OEMs signed in 2025 across all key regions of the world, the first year of its effective rollout.

The rear system brings clear gains to the electric vehicle scheduled to begin production in the coming years. Its lightweight thermoplastic design improves aerodynamic efficiency and enables a 20% reduction in CO₂ emissions compared with a steel solution. This high-level integration approach enables OPmobility to effectively introduce a plastic tailgate system on a B segment vehicle – a first in this category.

The award illustrates the rapid adoption by global OEMs of the One4you integrated offer, with 10 contracts signed with several OEMs in 2025, one year after its launch at the CES 2025 in Las Vegas. The One4you offer combines the Group's expertise in exterior body systems, lighting, modules and OP'nSoft, OPmobility's software development entity. The integrated approach increases design flexibility, adds value per vehicle and shortens development time, meeting global OEM demand for efficient, high-value exterior solutions.

Christian Kopp, Chief Operating Officer of OPmobility, stated: *"This award confirms the relevance of our One4you offer and of our ability to deliver smart, integrated exterior and lighting solutions that create real value for our customers. It reflects the trust we have built through close collaboration and a clear understanding of their priorities. It is a milestone in the One4you rollout that reinforces our position in exterior and lighting systems and confirms that our diversification strategy is translating into tangible results."*

About OPmobility

OPmobility is a world leader in sustainable mobility and a technology partner to mobility players worldwide. Driven by innovation since its creation in 1946, the Group is today composed of four complementary business groups that enable it to offer its customers a wide range of solutions: exterior and lighting systems, complex modules, energy storage systems and battery and hydrogen electrification solutions. OPmobility also offers its customers an activity dedicated to the development of software, OP'nSoft.

With economic revenue of 11.5 billion euros in 2025 and a global network of 152 plants and 40 R&D centers, OPmobility relies on its 38,100 employees to meet the challenges of sustainable mobility.

OPmobility is listed on Euronext Paris, compartment A. It is eligible for the Deferred Settlement Service (SRD) and is included in the SBF 120 and CAC Mid 60 indices (ISIN code: FR0000124570). www.opmobility.com
